Education/Employment

(Oct. 2014 →)	**post-doctoral fellow at University of Wisconsin – Madison** *advisor: Shanan Peters*
(2009 – 2014)	**graduate student at Princeton University (Princeton, NJ)**
Sept. 2014	**Ph.D.**, Department of Geosciences Thesis: *Constraining timing and origin of unusual carbon cycle dynamics in the terminal Proterozoic and middle Paleozoic Eons*
May 2011	**M.A.**, Department of Geosciences
(2003 – 2008)	**undergraduate at Harvard University (Cambridge, MA)**
	B.A., Earth and Planetary Sciences, *magna cum laude*

Honors/Awards

- Teaching Award (university-wide), *Association of Princeton Graduate Alumni* (2013)
- Outstanding Teaching Assistant Award, *National Association of Geoscience Teachers* (2013)
- Arnold Guyot Teaching Award, *Princeton Department of Geosciences* (2013)
- NSF Graduate Research Fellow (2010–2014)

Research Methods/Skills

field: high–precision mapping (30–cm 2σ) with the Trimble differential GPS system (R8 GPS base station and GeoXH rover); 15 months field work in Namibia, Canadian Arctic, Tanzania, maritime Canada, central Australia, South Australia, The Bahamas, Cyprus, upstate New York

laboratory: δ^{13}C and δ^{18}O measurements on GasBench II–Thermo Delta Plus and GasBench II–Sercon 20–22 instruments; trace element abundances on a Thermo Element 2 ICP–MS; $\delta^{44/40}$Ca and δ^{26}Mg measurements on a multi-collector Thermo Neptune Plus ICP–MS; U–Pb dating of single zircon grains on a PhoeniX62 TIMS instrument at low blank (Pb_c <1 pg) levels

programming/computing: MATLAB; ArcGIS; QGIS; HTML; Adobe Illustrator; LaTeX

Publications (*italics* denotes in-review/in-press; # denotes student co-author)

- **Husson, J.M.**, Maloof, A.C., and Schoene, B., 2010, Stratigraphic tests for the origin of the deepest carbon-isotope anomaly in Earth history - the Wonoka Formation of South Australia: Geological Society of America Abstracts with Programs, Vol. 42, No. 5, p. 397.

Professional Posters (# denotes student co-author)

- **Husson, J.M.**, Maloof, A.C., Schoene, B., and Higgins, J.A., 2013, Does the Shuram δ^{13}C excursion record Ediacaran oxygenation?: presented as PP51B-1948 at Fall Meeting, American Geophysical Union.

- **Husson, J.M.**, Schoene, B., Bluher, S.E.$^{\#}$ and Maloof, A.C., 2013, Absolute time constraints on the Silurian-Devonian boundary δ^{13}C excursion: American Association of Petroleum Geologists Annual Convention and Exhibition, Pittsburgh, PA.

- **Husson, J.M.**, Maloof, A.C., and Schoene, B., 2012, A syn-depositional age for Earth's deepest δ^{13}C excursion required by isotope conglomerate tests: Fermor Meeting of the Geological Society of London.

Teaching/Advising Experience

- Princeton University Teaching Assistant:

  S2013: **Structural Geology** with Prof. B. Schoene

  F2012: **Fundamentals of Solid Earth Science** with Profs. J. Tromp and J. Higgins

  F2011: **Earth's Environment and Ancient Civilizations** with Profs. A. Maloof and F. Simons

- High school guest teacher in Earth history (2–3x per year; 2009–2014)

- Trained 18 undergraduates to work in geochemistry laboratories and 3 undergraduates as field assistants (2009 – 2013)

- Supervised two independent undergraduate research projects (1 month of field work, 6 months of independent lab work) by Christine Y. Chen ('13) and Sarah E. Bluher ('14). These projects grew into papers co-authored with both undergraduate students (see above).
